

# Future Lab Drone Intensive

## Day 1 – January 20

| Time        | Drone Racing                                     | Drone Programming Competition                                                        | Entertainment Activities (All Day)                              |
|-------------|--------------------------------------------------|--------------------------------------------------------------------------------------|-----------------------------------------------------------------|
| 12:00–18:00 | —                                                | —                                                                                    | Drone Basketball, Drone Fishing, Drone Biathlon, FPV simulators |
| 13:00–14:00 | Registration of racing participants (ages 14–17) | Registration of Bumblebee UAS competition participants                               | Entertainment zones in operation                                |
| 14:00–14:15 | Official opening of the intensive                | Official opening of the intensive                                                    | Entertainment zones in operation                                |
| 14:15–15:00 | Qualification races                              | Familiarization with workstations                                                    | Entertainment zones in operation                                |
| 15:00–16:00 | Training races                                   | <b>Lecture 1. Fundamentals of Unmanned Aerial Systems Control. The Bumblebee UAS</b> | Entertainment zones in operation                                |
| 16:00–16:30 | Break                                            | Practical session                                                                    | Entertainment zones in operation                                |
| 16:30–17:00 | Main competitive races                           | Break                                                                                | Entertainment zones in operation                                |
| 17:00–18:00 |                                                  | <b>Lecture 2. Fundamentals of Programming. LED Indicator Control and Programming</b> | Entertainment zones in operation                                |
| 18:00–19:30 | Final races of the day                           | Practical session                                                                    | Entertainment zones in operation                                |
| 20:30       | Award ceremony                                   | —                                                                                    | —                                                               |

## Day 2 – January 21

| Time        | Drone Racing                              | Drone Programming Competition                                                  | Entertainment Activities (All Day)              |
|-------------|-------------------------------------------|--------------------------------------------------------------------------------|-------------------------------------------------|
| 12:00–18:00 | —                                         | —                                                                              | Interactive zones and live drone demonstrations |
| 13:00–14:00 | Registration of racing participants (21+) | —                                                                              | Entertainment zones in operation                |
| 14:00–15:00 | Qualification races                       | <b>Lecture 3. Payload Programming for the Bumblebee Unmanned Aerial System</b> | Entertainment zones in operation                |
| 15:00–15:30 | Break                                     | Practical session                                                              | Entertainment zones in operation                |
| 15:30–16:00 | Semifinal races                           | Break                                                                          | Entertainment zones in operation                |
| 16:00–17:00 |                                           | <b>Lecture 4. Training Flights and Practical Skills Development</b>            | Entertainment zones in operation                |

## Day 3 – January 22

| Time        | Drone Racing | Drone Programming Competition                           | Entertainment Activities (All Day) |
|-------------|--------------|---------------------------------------------------------|------------------------------------|
| 12:00–16:00 | —            | —                                                       | Interactive zones and demo flights |
| 12:00–13:00 | —            | <b>Training flights with payload (exhibition stand)</b> | Entertainment zones in operation   |
| 14:00–14:15 | —            | Preparation for qualification flights                   | Entertainment zones in operation   |
| 14:15–15:15 | —            | Final autonomous flights                                | Entertainment zones in operation   |
| 15:15–15:45 | —            | Jury evaluation and workspace cleanup                   | Entertainment zones in operation   |
| 15:45–16:15 | —            | Results announcement and award ceremony                 | —                                  |
