

**Regulations
on Holding a Drone Racing Competition
(Unmanned Aerial Vehicles)
“Future Lab Intensive”**

1. GENERAL PROVISIONS

1.1. The drone racing competition (unmanned aerial vehicles) “**Future Lab Intensive**” (hereinafter referred to as the *Competition*) is held in accordance with the rules of the sport “**Drone Racing (Unmanned Aerial Vehicles)**”.

1.2. The Competition is held in an in-person format with the aim of engaging the active population in systematic participation in technical sports.

1.3. The objectives of the Competition are:

- popularization of the sport “**Drone Racing (Unmanned Aerial Vehicles)**”;
- improvement of sports mastery in the discipline “**Drone Racing (Unmanned Aerial Vehicles)**”;
- promotion of the development of technical sports.

Competition Program

INDIVIDUAL STANDINGS

January 20, 2026: from 13:00 to 20:30 (ages 14–17)

January 21, 2026: from 13:00 to 20:30 (ages 21+)

Drone Racing: conditions and competition system

All registered participants are divided into groups in the order of registration (no more than 4 participants per group).

Discipline — drones, **75 mm class**, individual standings.

Participants compete, according to the draw, in qualification and ranking flights in groups of 4 pilots.

Based on the results of the qualification flights, groups for the quarterfinals are formed.

2. VENUE AND DATES

2.1. Venue: **Future Lab – United Arab Emirates, Abu Dhabi, KEZAD Warehouses (KLP-4), Unit B14-04**

Coordinates: 24.719922, 54.750286

2.2. Competition dates: **January 20–21, 2026**

3. RIGHTS AND OBLIGATIONS OF THE ORGANIZERS

3.1. The direct organization and conduct of the Competition is assigned to the **Future Lab Intensive team** (hereinafter referred to as the *Organizer*).

3.2. The Organizer forms the judging panel and prepares the competition venue in accordance with the Rules.

4. PARTICIPANT REQUIREMENTS AND CONDITIONS OF ADMISSION

4.1. Age category of participants: **14 years and older**.

4.2. The Competition is held in the following discipline:

- drone racing in the **75 mm class**.

4.3. Participants in the 75 mm class must use a personal drone up to 75 mm, equipped with an FPV system, a battery with a nominal voltage of **3.7 V**.

Video transmitter: analog or **HDZero**, power up to **25 mW**.

Propeller guards on the drone frame are mandatory.

4.4. Quarterfinal flights are then conducted. Participants who place **1st and 2nd** advance to the semifinals. Participants who place **3rd and 4th** are eliminated.

4.5. Semifinal flights are then conducted. Participants who place **1st and 2nd** advance to the final. Participants who place **3rd and 4th** are eliminated.

5. Rules Before the Flight

5.1. Before the start of the flight, participants of the current race submit their drones ready for flight to the technical control judges for inspection and wait in the participant zone.

A designated assistant of each pilot must be in the pre-start zone to place the drone on the capturing platform and power it on upon the command of the technical control judge.

5.2. Participants located in the athlete zone must have with them:

- a drone;
- a control transmitter;
- receiving equipment.

5.3. If a participant is absent from the athlete zone before the start of their group's flight, they are not allowed to compete in that flight.

5.4. If a pilot detects a video signal issue before the start of the flight, they must inform the technical control judge.

5.5. The technical control judge is obliged to:

- personally verify the presence of video signal issues;
- check the participant's receiving equipment by comparing the video signal quality on other receiving equipment.

5.6. If video signal problems are confirmed, the technical control judge identifies the source of interference — another drone.

5.7. The pilot whose drone causes interference may replace the drone with a spare one using their designated assistant.

If the spare drone cannot be prepared within **1 minute**, the pilot does not participate in the current flight.

5.8. In case of drone malfunction, the drone may be prohibited from further participation in the Competition.

6. Procedure for Conducting Competition Flights

6.1. Upon the judges' command, participants of the current race take their positions in the *pilot zone*, their designated assistants take positions in the drone start zone, and athletes of the next group move to the pre-start zone.

Presence of unauthorized persons in the pilot zone, pre-start zone, and start zone is prohibited.

6.2. Upon the judge's command, assistants place the drones on the starting platform and register them in the timing system.

6.3. Upon the judges' command, participants check video signal quality and drone functionality by spinning the motors.

Motor activation without the judges' command is prohibited and results in a warning or disqualification from the current flight.

6.4. Participants confirm video quality and readiness to start by raising a hand. After the sound signal from the Deputy Chief Judge, the flight begins.

- 6.5.** After confirming readiness, removal of goggles by the pilot signifies completion of the flight.
- 6.6.** After the end of the flight or upon its termination by the judges, the drone must land in the *landing zone*.
- 6.7.** If the pilot cannot land in the landing zone, they must remotely disable the video transmitter and radio receiver. Failure to do so may result in a warning or disqualification.
- 6.8.** After the flight, technical control judges deliver the drones to the pre-start zone.
- 6.9.** Subsequent flights are conducted according to the procedure described in clauses **6.1–6.8**.
- 6.10.** If a pilot leaves the pilot zone before all group flights are completed, this is considered withdrawal from the stage.
-

7. Reflights

- 7.1.** If a race is stopped by decision of the judging panel, a reflight of the entire group is назначен.
- 7.2.** In case of a false start during group or final stages, a reflight of the entire group is conducted.
The participant who made the false start receives a warning.
- 7.3.** In case of a collision caused by incorrect course navigation by one participant, resulting in the crash of one or more drones, a reflight of the entire group is conducted, except for the participant at fault.
The participant at fault automatically takes last place in the current flight.
- 7.4.** A collision caused by improper landing after finishing, affecting another participant who has not finished the flight, is treated the same as a collision caused by incorrect course navigation.
The participant at fault automatically takes last place in the current flight.
- 7.5.** If a drone is damaged during a flight without interference from other participants, a reflight is not conducted.
-

8. Distribution of Participants into Groups

- 8.1.** The Competition awards individual standings in the **75 mm** class.
- 8.2.** Distribution of participants into groups during the qualification stage, starting positions, and order of group flights are determined by a draw in accordance with the Rules.
- 8.3.** Training flights are conducted up to **2 times**.
Flight duration: up to **2.5 minutes**.
The participant must complete the highest number of laps within the allotted time.
- 8.4.** Qualification flights are conducted **3 to 5 times** per group, with a duration of up to **2.5 minutes**.
The qualification result is the best single-lap time recorded across all attempts.
According to the Rules, **4/8/16/32 participants** (at the Organizer's discretion) advance to the final stage.
- 8.5.** Final groups are formed based on qualification results (no more than 4 participants per group).
- 8.6.** One final flight is conducted for each group. After that, new final groups are formed, with the top two participants from each group advancing.
This cycle continues until three participants are determined and declared winners.

8.7. Final flight results are evaluated based on the shortest time required to complete up to **4 laps** (at the Organizer's discretion).

9. AWARDING

The Organizer provides prizes to participants who place in prize-winning positions in the manner and quantities determined by the Organizer. The prizes are intended to be material items (for example: a laptop, a tablet, smart glasses); however, the Organizer reserves the right to substitute specific models and the number of prizes with other material items.

10. APPLICATIONS FOR PARTICIPATION

10.1. For preliminary registration, participants must submit an application using the **Future Lab Intensive** form via the link:

<https://docs.google.com/forms/d/e/1FAIpQLSd0DiZa4ejNN0dp6ruJD-ioFU6hlpcvUyUsdgAERrdk6nem0w/viewform?usp=dialog>

no later than **January 19, 2026**.

10.2. On-site registration will take place on **January 20, 2026**.

For on-site registration, participants must have:

- an application for participation;
 - a passport (original) or other identification document.
-
